220l plastic drum

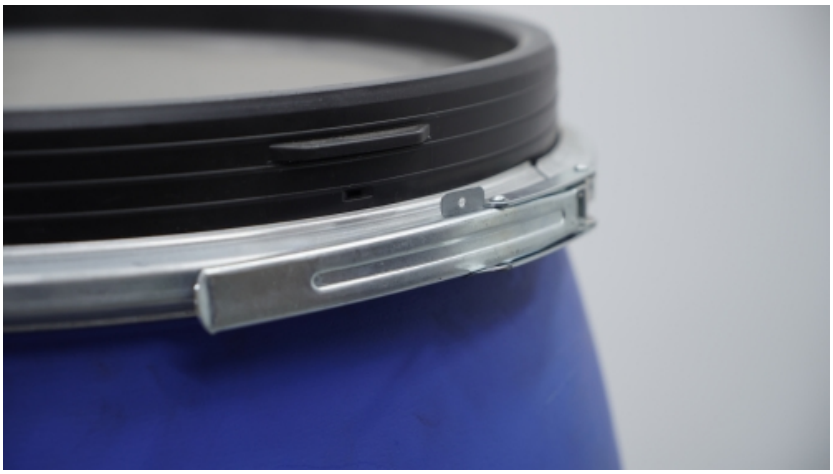

Description

220 liter drums of high density polyethylene and high molecular weight (HMW-HDPE). Cover with full opening of high density polyethylene (HDPE) with total openness. Dimensions Ø 594 - Alto 975 with a capacity of 220 liters. Hoop closure strap and galvanized steel. The hoop pressed body with the standard cap, offer basic advantages, increased chance of loaded in stacks. Improves resistance to falls, increasing tightness. Made PWDS (radial distribution) achieving a more uniform thickness that enable better compressive strength. Easy opening and closing. Easier handling. Emptying optimal. Transport Safety. Easy handling with traditional mechanisms.
